Taxonomy
Home » Administration » Structure
Taxonomy is for categorizing content. Terms are grouped into vocabularies. For example, a vocabulary called "Fruit" would contain the terms "Apple" and "Banana".

Home » Administration » Structure » Taxonomy » Event Topics
Created new vocabulary Event Topics.
You can reorganize the terms in Event Topics using their drag-and-drop handles, and group terms under a parent term by sliding them under and to the right of the parent.
+ Add term
Now we can add terms to the vacabulary pool.
