You can find modules and themes on drupal.org. The following file extensions are supported: tar tgz gz bz2 zip.
Install from a URL
https://ftp.drupal.org/files/projects/devel-8.x-1.0-alpha1.tar.gz
For example: http://ftp.drupal.org/files/projects/name.tar.gz
Paste link to here.
Or
Upload a module or theme archive to install
Choose File
No file chosen
For example: name.tar.gz from your local computer
Install

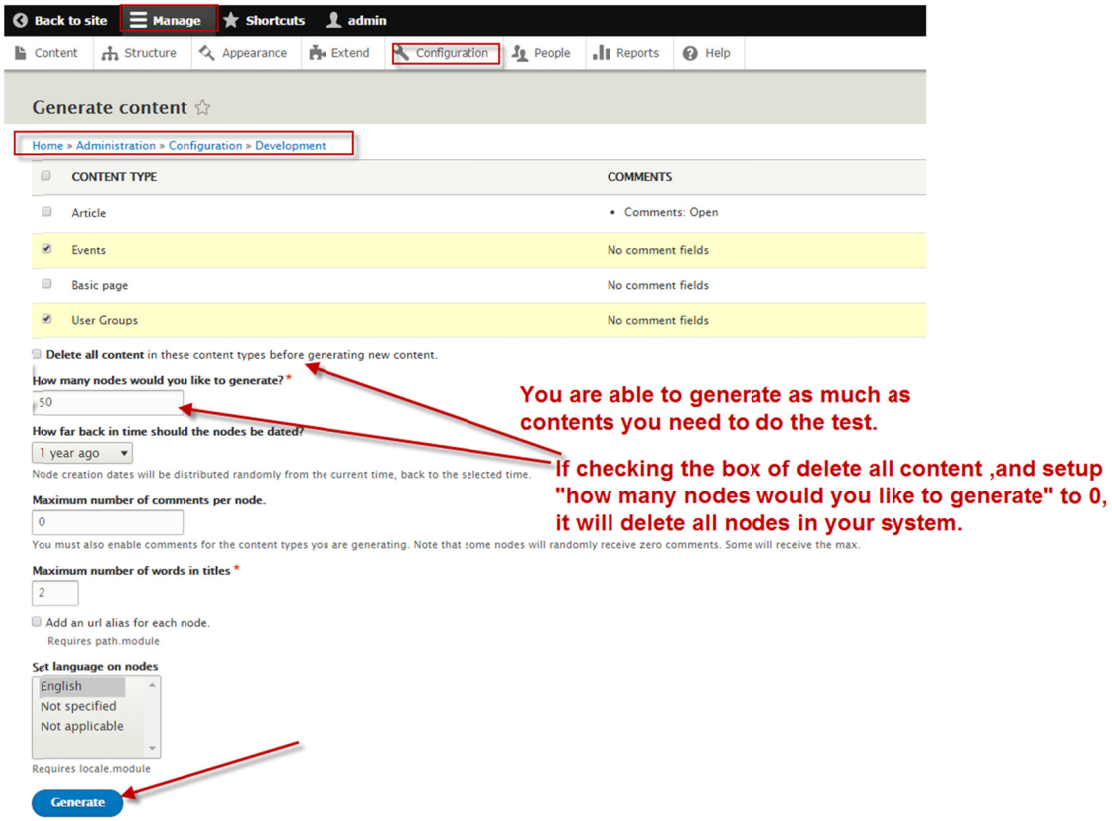

localhost/drupal/core/authorize.php?batch=1&id=7&op=start

One or more problems were detected with your Drupal installation. Check the status report for more information.
Hide descriptions
PEOPLE
Account settings
Configure default user account settings, including fields, registration requirements, and email messages.
CONTENT AUTHORING
Text formats and editors
Select and configure text editors, and how content is filtered when displayed.
DEVELOPMENT
Performance
Configure caching and bandwidth optimization.
Logging and errors
Configure the display of error messages and database logging.
Maintenance mode
Take the site offline for updates and other maintenance tasks.
Configuration synchronization
Import and export your configuration.
Devel settings
Helper functions, pages, and blocks to assist Drupal developers. The devel blocks can be managed via the block administration page.
Generate content
Generate a given number of content. Optionally delete current content.
Generate menus
Generate a given number of menus and menu links. Optionally delete current menus.
Generate terms
Generate a given number of terms. Optionally delete current terms.
Generate users
Generate a given number of users. Optionally delete current users.
Generate vocabularies
Generate a given number of vocabularies. Optionally delete current vocabularies.
SEARCH AND METADATA
Search pages
Configure search pages and search indexing options.
URL aliases
Add custom URLs to existing paths.
WEB SERVICES
RSS publishing
Configure the site description, the number of items per feed, and whether feeds should be titles/teasers/full-text.
SYSTEM
Basic site settings
Change site name, email address, slogan, default front page, and error pages.
Cron
Manage automatic site maintenance tasks.
USER INTERFACE
Shortcuts
Add and modify shortcut sets.
MEDIA
File system
Configure the location of uploaded files and how they are accessed.
Image styles
Configure styles that can be used for resizing or adjusting images on display.
Image toolkit
Choose which image toolkit to use if you have installed optional toolkits.
REGIONAL AND LANGUAGE
Regional settings
Configure the locale and timezone settings.
Date and time formats
Configure how dates and times are displayed.

No comment fields
Delete all content in these content types before gererating new content.
How many nodes would you like to generate? *
50
How far back in time should the nodes be dated?
1 year ago
Node creation dates will be distributed randomly from the current time, back to the selected time.
Maximum number of comments per node.
0
You must also enable comments for the content types you are generating. Note that some nodes will randomly receive zero comments. Some will receive the max.
Maximum number of words in titles *
2
Add an url alias for each node.
Requires path.module
Set language on nodes
English
Not specified
Not applicable
Requires locale.module
Generate
You are able to generate as much as contents you need to do the test.
If checking the box of delete all content ,and setup "how many nodes would you like to generate" to 0, it will delete all nodes in your system.

We can do the layout and other things in out site without taking a lot of time to generate the real content, because the development module can do it for us.

This module is called contributed module.
