Check for updates
Daily
Weekly
Select how frequently you want to automatically check for new releases of your currently installed modules and themes.
Check for updates of uninstalled modules and themes
Email addresses to notify when updates are available
Whenever your site checks for available updates and finds new releases, it can notify a list of users via email. Put each address on a separate line. If blank, no emails will be sent.
Email notification threshold
All newer versions
Only security updates
You can choose to send email only if a security update is available, or to be notified about all newer versions. If there are updates available of Drupal core or any of your installed modules and themes, your site will always print a message on the status report page, and will also display an error message on administration pages if there is a security update.

Status report

Home » Administration » Reports

Here you can find a short overview of your site's parameters as well as any problems detected with your installation. It may be useful to copy and paste this information into support requests filed on Drupal.org's support forums and project issue queues. Before filing a support request, ensure that your web server meets the system requirements.

Drupal	8.1.10
Access to update.php	Protected
Configuration files	Protected
Cron maintenance tasks	Last run 2 hours 12 minutes ago You can run cron manually. To run cron from outside the site, go to /drupal/cron/zG1JXd6tccH_JhQlVGgCquXonDwKTLXa4D0crTceCIj_EplwU2rb95KUpUchOp2khVG97rivZA?absolute=1
Database system	MySQL, MariaDB, Percona Server, or equivalent
Database system version	5.7.15-log
Database updates	Up to date
Drupal core update status	Out of date (version 8.2.1 available) There are updates available for your version of Drupal. To ensure the proper functioning of your site, you should update as soon as possible. See the available updates page for more information and to install your missing updates.
Entity/field definitions	Mismatched entity and/or field definitions The following changes were detected in the entity type and field definitions. **Content** • The *URL alias* field needs to be uninstalled. **Taxonomy term** • The *URL alias* field needs to be uninstalled.
File system	Writable (*public* download method)
GD library	bundled (2.1.0 compatible)
GD library PNG support	bundled (2.1.0 compatible)
Image toolkit	gd GD2 image manipulation toolkit
Module and theme update status	Up to date
Node Access Permissions	Disabled If the site is experiencing problems with permissions to content, you may have to rebuild the permissions cache. Rebuilding will remove all privileges to content and replace them with permissions based on the current modules and settings. Rebuilding may take some time if there is a lot of content or complex permission settings. After rebuilding has completed, content will automatically use the new permissions. Rebuild permissions
PHP	5.6.26 (more information)
PHP extensions	Enabled
PHP memory limit	128M
PHP OPcode caching	Enabled
Search index progress	100% (0 remaining)
Token types are not defined but have tokens	• $info['types']['entity']
Trusted Host Settings	Not enabled The trusted_host_patterns setting is not configured in settings.php. This can lead to security vulnerabilities. It is **highly recommended** that you configure this. See Protecting against HTTP HOST Header attacks for more information.
Unicode library	PHP Mbstring Extension
Update notifications	Enabled
Upload progress	Not enabled Your server is capable of displaying file upload progress, but does not have the required libraries. It is recommended to install the PECL uploadprogress library (preferred) or to install APC.
Web server	Apache/2.4.23 (Win64) OpenSSL/1.0.2h PHP/5.6.26
