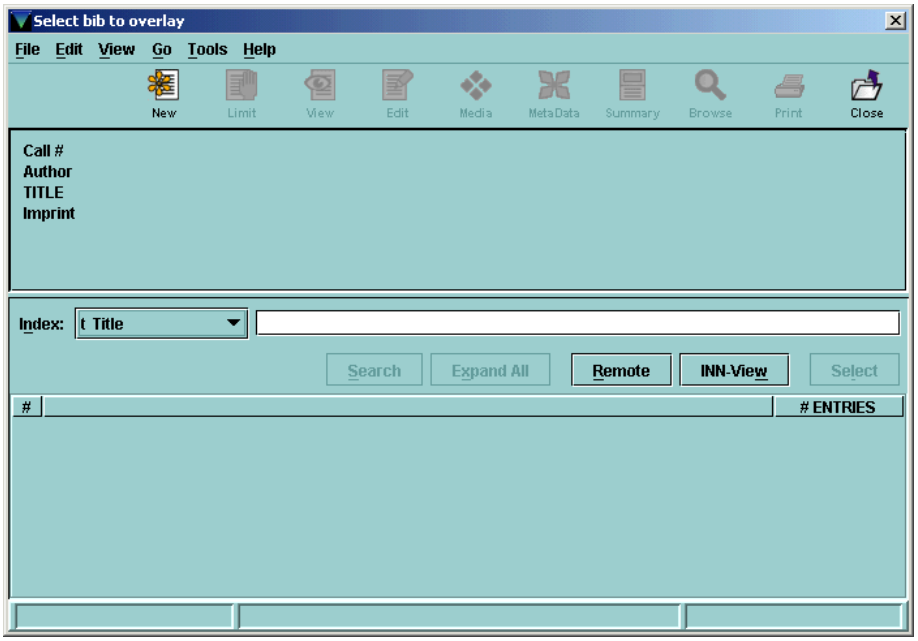
Choosing a Record to Overlay

1. Select the record in the browse display and choose Select.
2. In the new bibliographic or authority record display, choose Edit | Overlay | Find Bib or Find Authority.



3. Retrieve the record you want to overlay.
    - If only one record matches your search criteria, that record displays in a summary record view. You can view the record details by choosing View.
    - If multiple records match your criteria, the records display in a browse list. You can view a record in the list by selecting the record in the list and choose View.

      Alternatively, you can select the record in the list, choose Select, and then choose View in the summary record display.

4. When you finish viewing the record details, choose Use Bibliographic Record.
5. To change the record after it has been overlaid, choose Edit.

   See Maintaining Records for more information about editing records.

6. To see the record you are going to overlay, choose Edit | View Existing Record.
7. When you are finished making any changes, Save the overlaid record.
