Record Types Accessed by Searches

When you retrieve records in Millennium, you enter search criteria. Additional search criteria may be imposed by the application and mode. The record types that can be accessed by searches vary by application and mode. The following table displays the:

- application and mode
- record types that may be retrieved in the mode
- availability of 'search an index' and 'search an index subset' methods and the search criteria imposed by the method
- availability of search limiting

Application	Mode	Record Types	Search Index	Search Subset	Limit Search
Millennium Acquisitions	Orders	Authority, bibliographic, checkin, item, order, patron, routing	Yes (bibliographic, item, order, checkin only)	Yes	Yes
