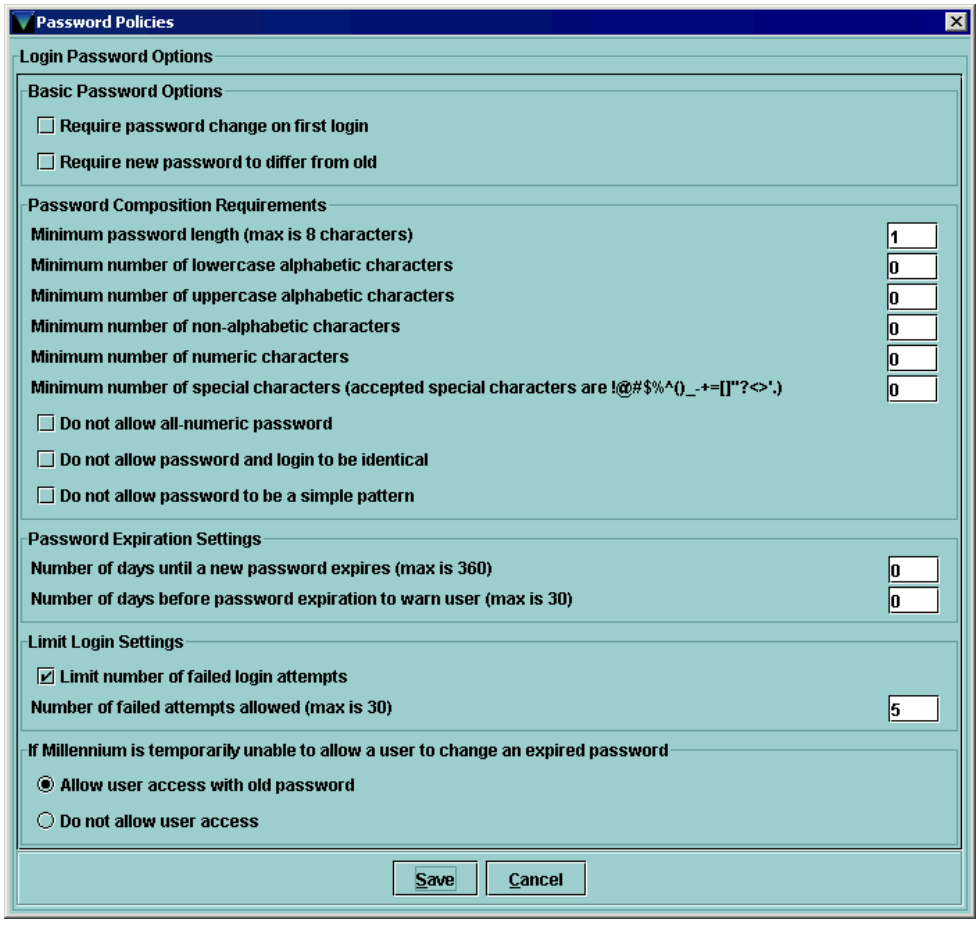
Setting Password Policies

To manage password policies, you must be authorized for function 607 (Administer Password Policies). See Authorized Functions for more information.

Set the Login: Enable Password Policies option to **YES** to enable password policy management.


Millennium password policy settings provide detailed control of your system's login security functions. Many of these options are mutually interactive, so you should plan carefully to avoid setting conflicts and ensure expected behavior. In Millennium Administration, choose Admin | Parameters | Security | Password Policies to open the Password Policies window:
