Back to Top

Installing WinSCP

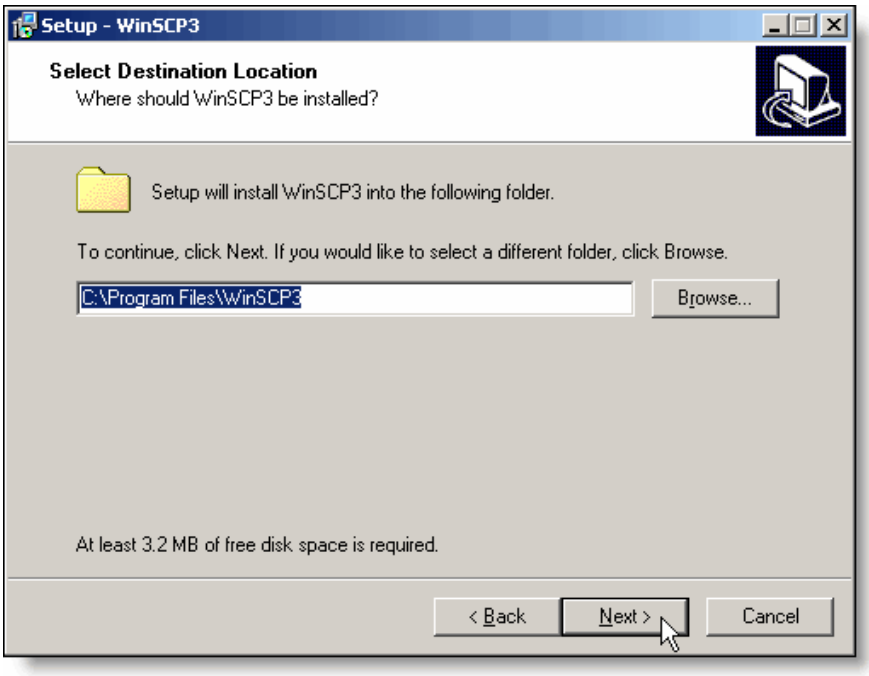

1. On the WinSCP download page, click the link *Download WinSCP for Windows* link at the upper right of the page.
2. In the **Save As** window, save the file to your Desktop and then click **Save**.
3. In the **Welcome** screen of the Setup Wizard, click **Next**.

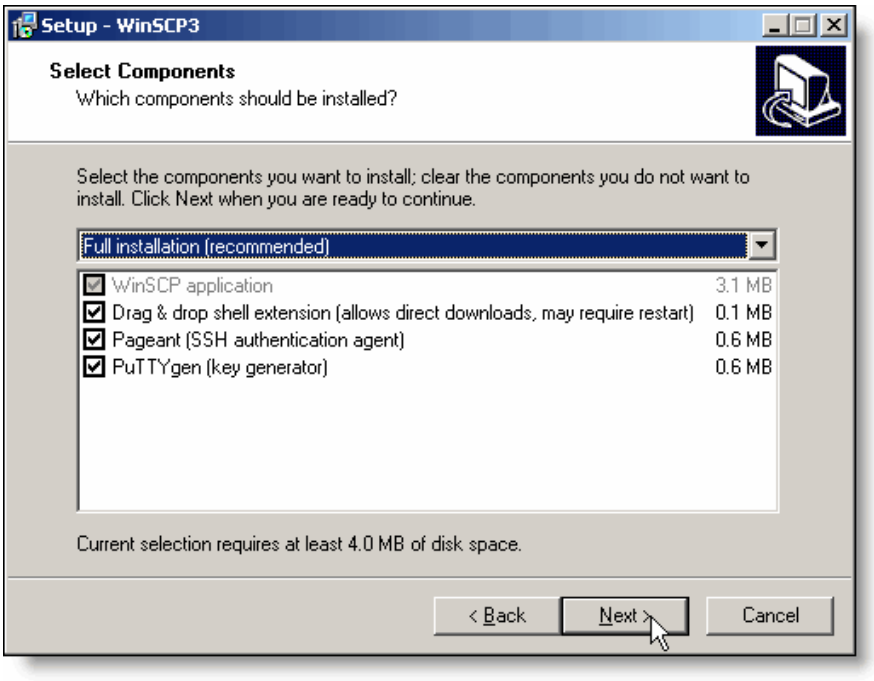

4. Select the option **I accept the agreement** and then click **Next**.

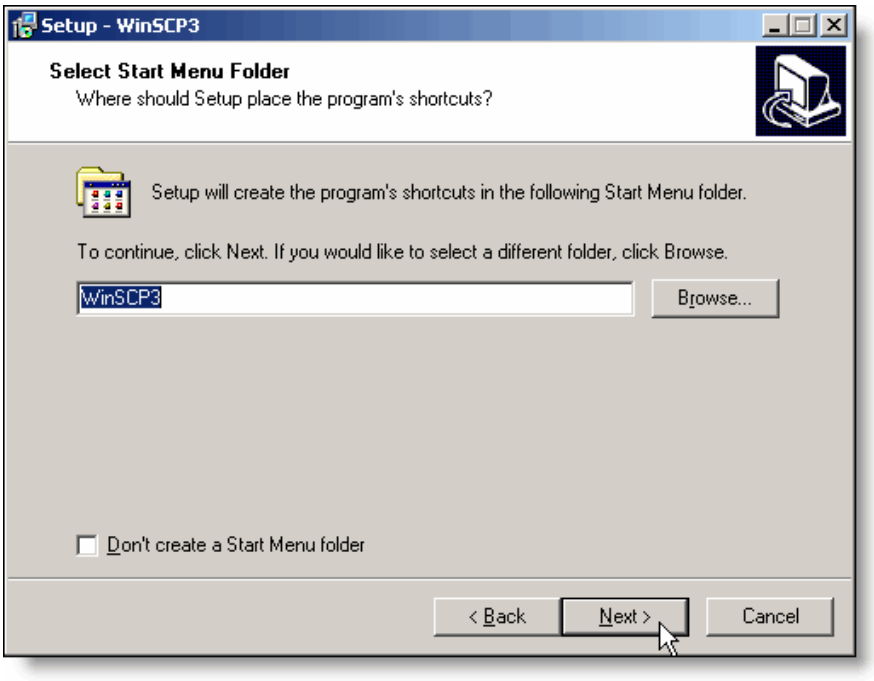

5. Select the location where you want to install WinSCP. You can choose the default location, or click **Browse** if you want to select a different location. Click **Next**.

6. Click **Next** to install all the components of WinSCP.

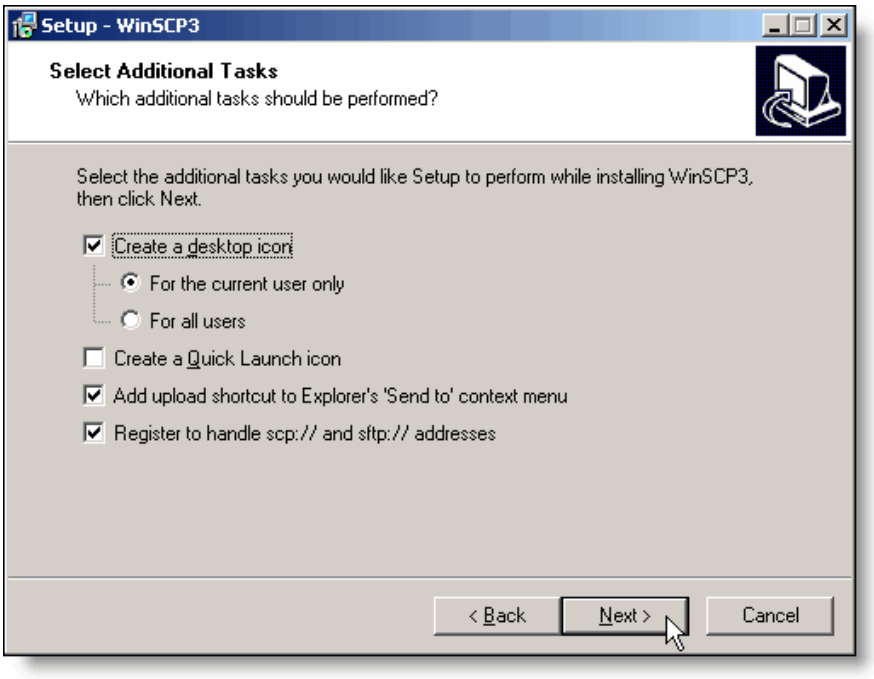

7. Click **Next** to create a shortcut icon for WinSCP in the Start Menu with the default name shown.

The following options are also available:

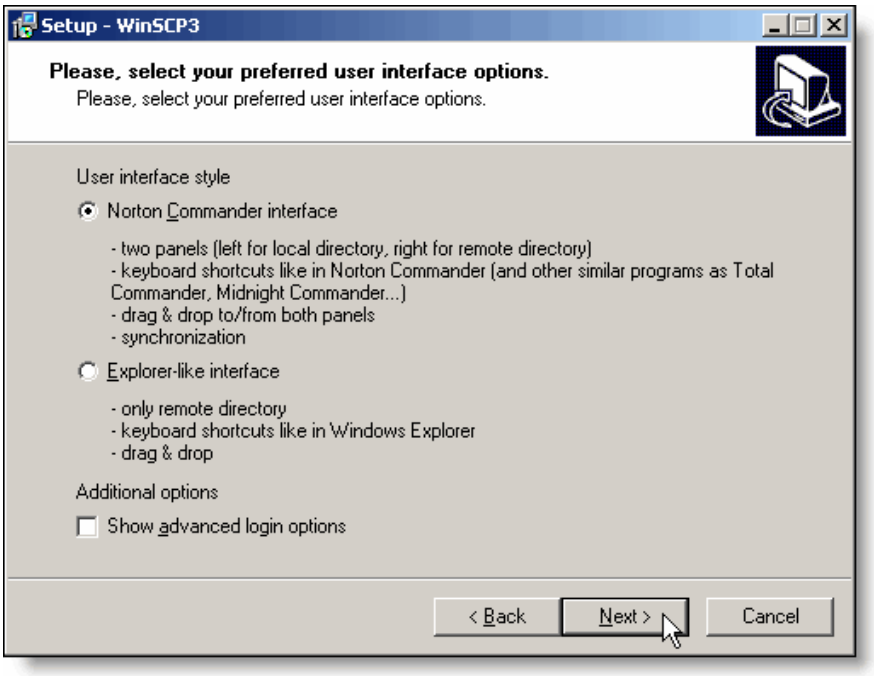

- If you don't want to create a shortcut in your Start Menu, click the check box next to the option **Don't create a Start Menu folder**.
- If you want to create a shortcut but want to change the default shortcut name, enter the name you want and then click **Next**.
- If you want the shortcut to appear in a different folder, click **Browse** to select the desired folder and then click **Next**.

8. Click **Next** to enable the Setup Wizard to perform the selected additional tasks.

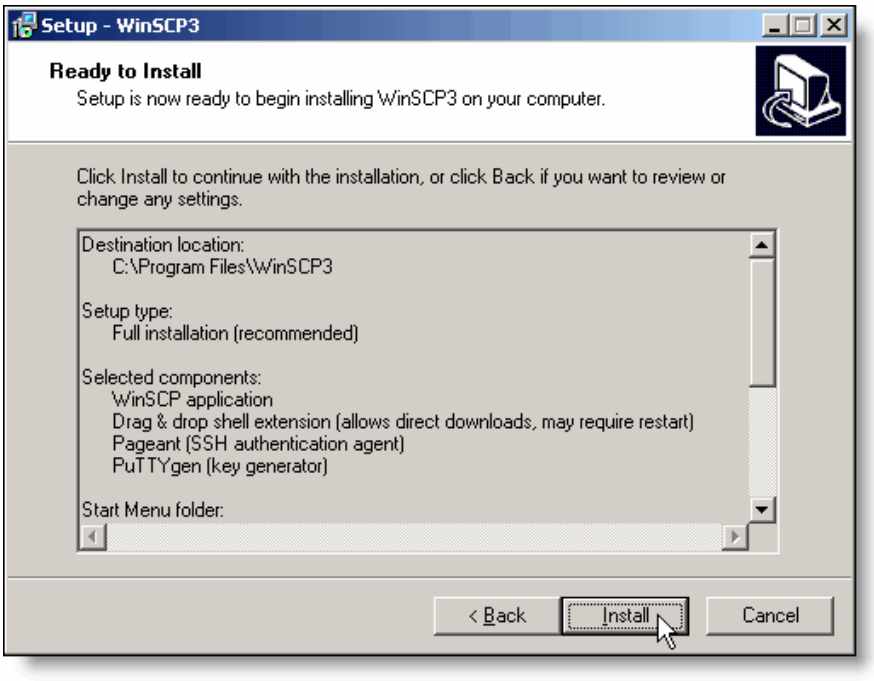

9. Select the type of interface you want to use and then click **Next**. (Click here for a brief description of each interface type.)

   Note: If you select the *Norton Commander* interface, you may want to select the option **Explorer style selection** from the **Commander** category in the Preferences window. This option enables you to select files and directories exactly the same as in Windows Explorer.

10. Review your installation settings and then click **Next**. Click the **Back** button if you need to go back and change anything.

11. Deselect the option **Launch WinSCP** if you don't want to open WinSCP at this time. If you wish to open WinSCP now, see *Opening WinSCP for the First Time*. Click **Finish**.

Opening WinSCP for the First Time

When you first open WinSCP for the first time, you will need to enter the host name to which you're connecting and your user name. You will be able to save these settings in WinSCP so they will appear when you open WinSCP again.

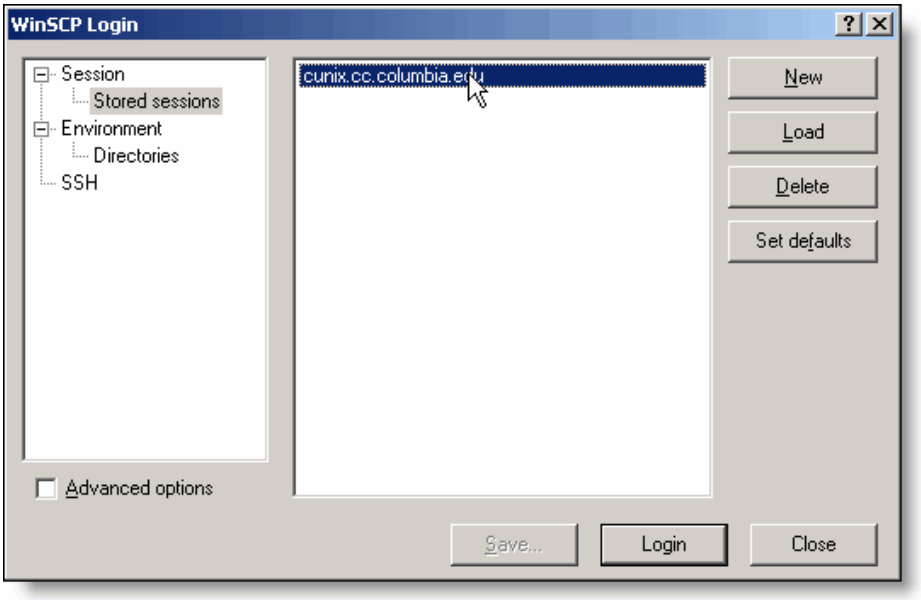

1. In the **WinSCP Login** screen, enter **cunix.cc.columbia.edu** in the **Host name** field, enter your CUNIX ID (your own UNI, not js123 as shown in the screen example) in the **User name** field, and then click **Save**.

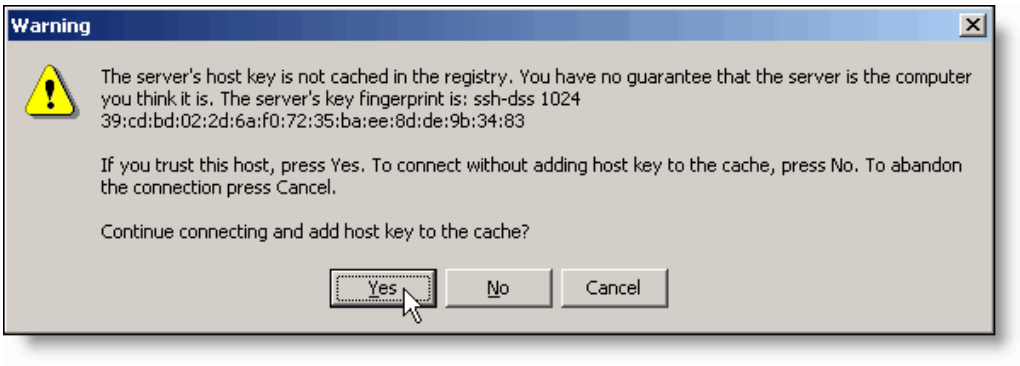

2. Click **OK** in the **Save session as** pop-up window.

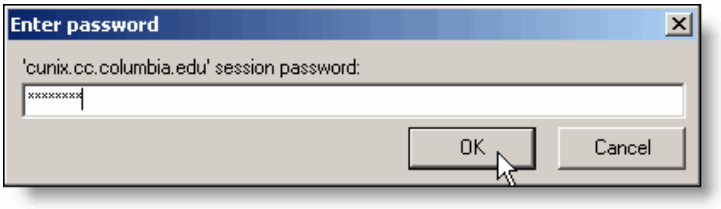

3. Double-click on **cunix.cc.columbia.edu**, or select **cunix.cc.columbia.edu** and then click **Login**.

4. Click **Yes** in the Warning pop-up window to proceed with connecting to the host. ***Note:*** This window should only appear the first time you log in.

5. Enter your CUNIX password and then click **OK**. (You will need to have a valid CUNIX account in order to transfer files between your computer and the CUNIX server.)
