Extracting Lexical Features Intradocument Parsing

By Andy Tang

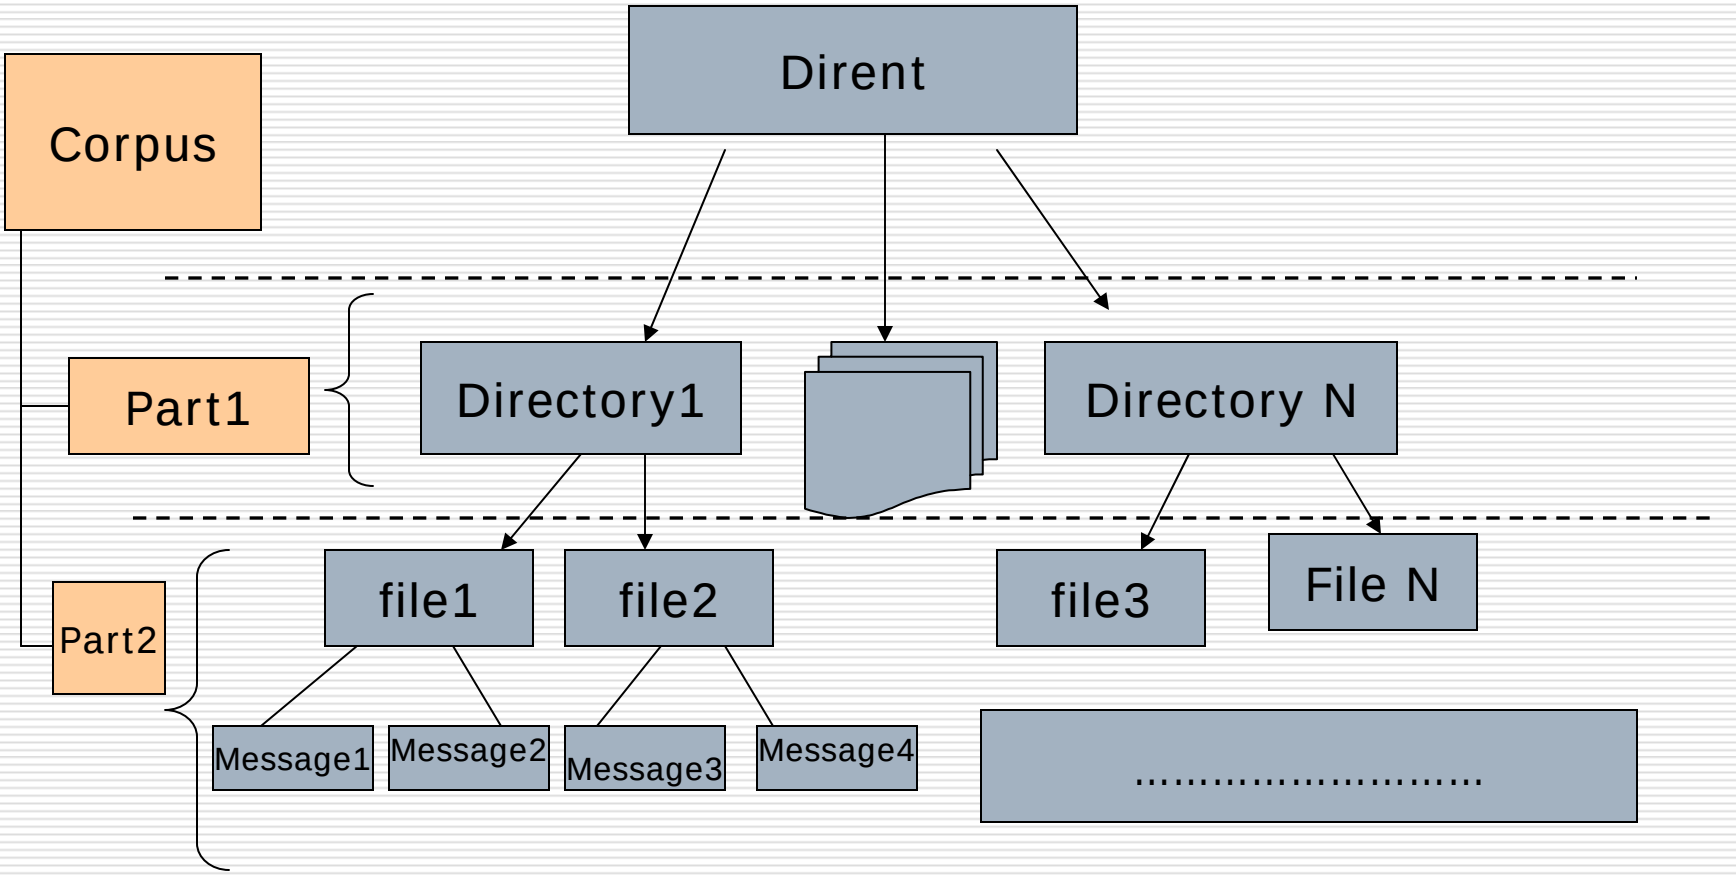

Extracting Lexical Features

The three phases in developing the software tools

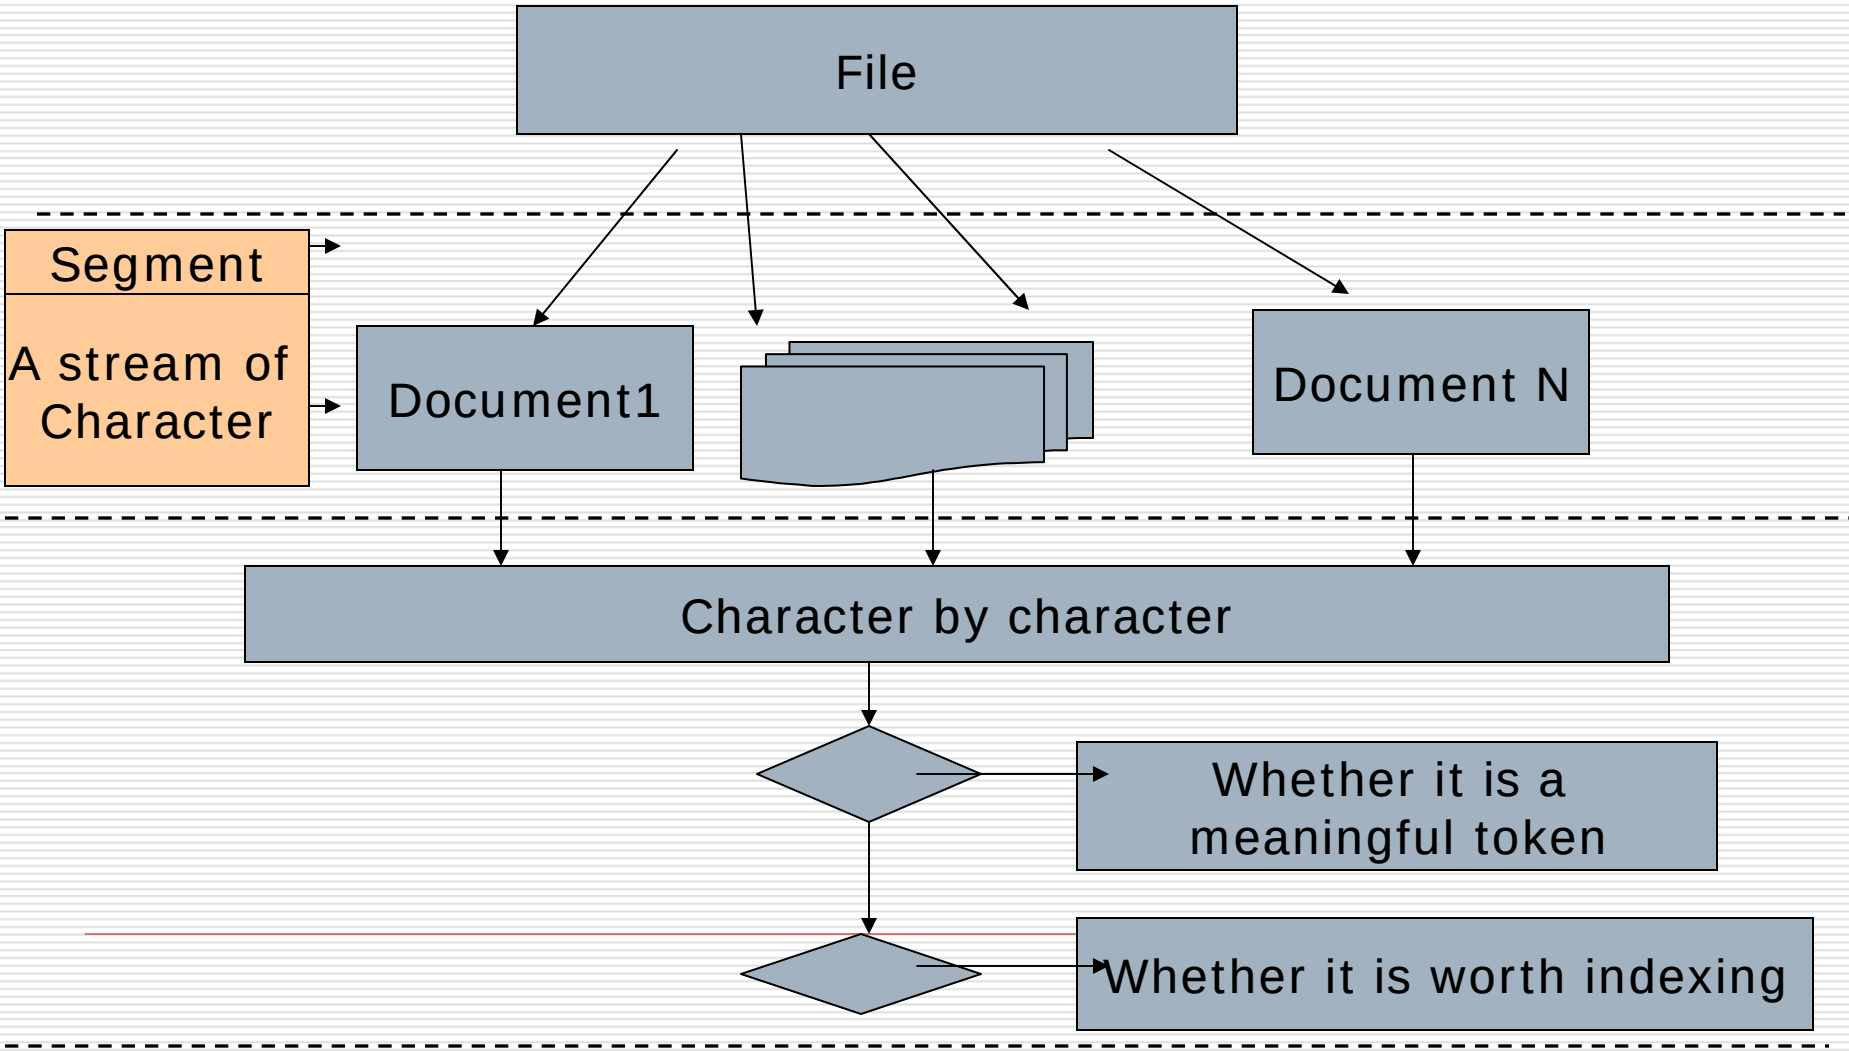

Extracting Lexical Features

Interdocument parsing

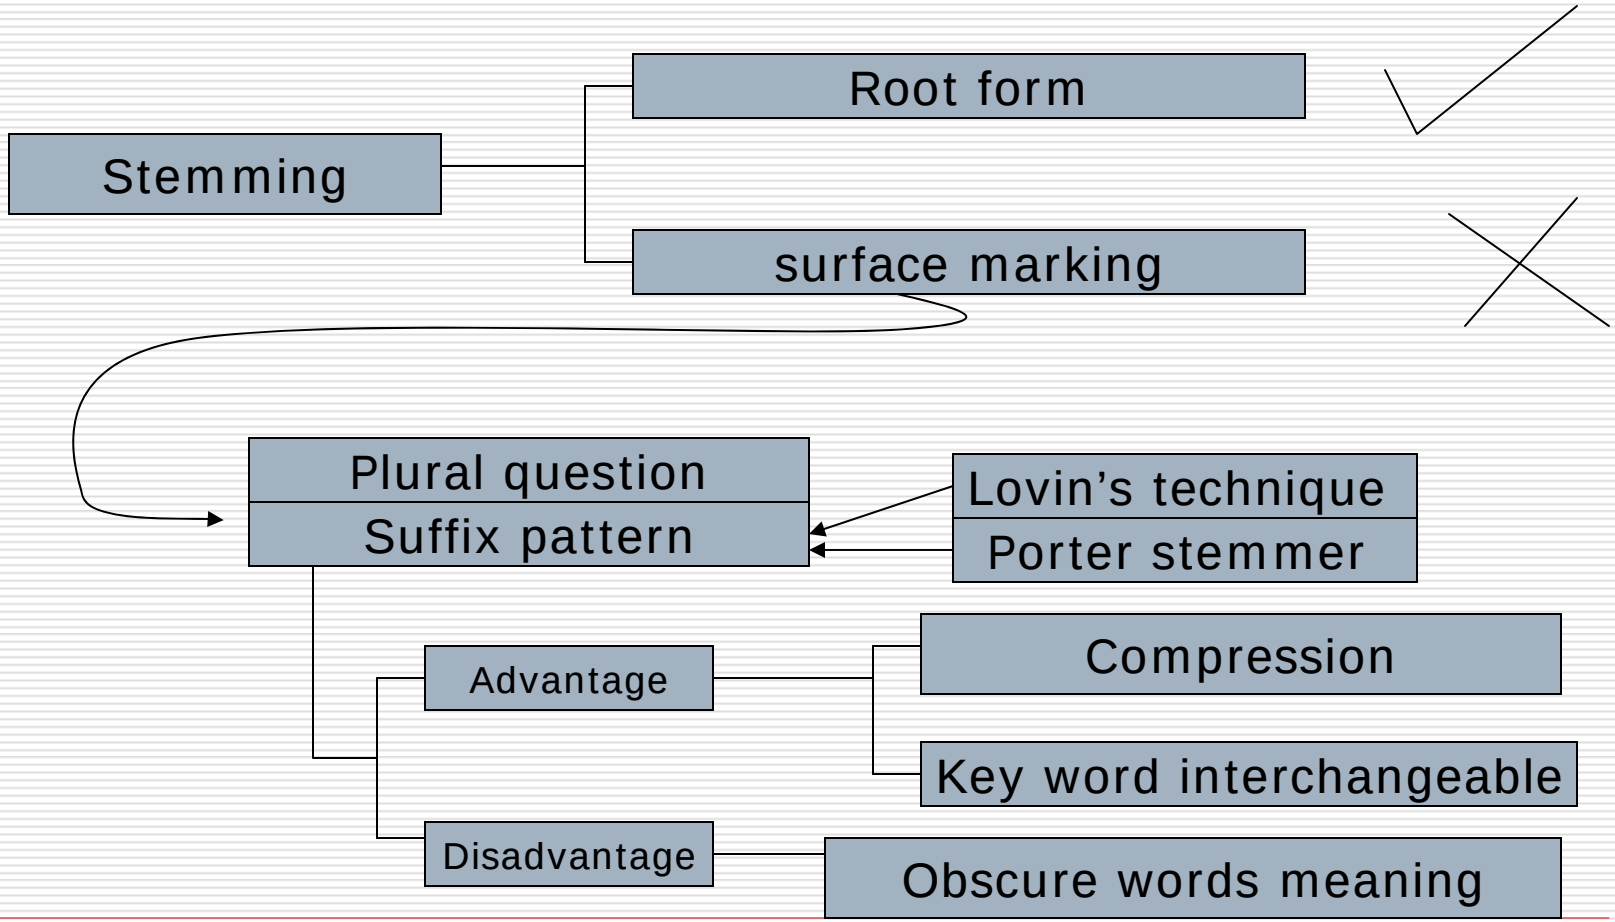

Extracting Lexical Features

Intradocument parsing

Extracting Lexical Features

Stemming and Other Morphological Processing

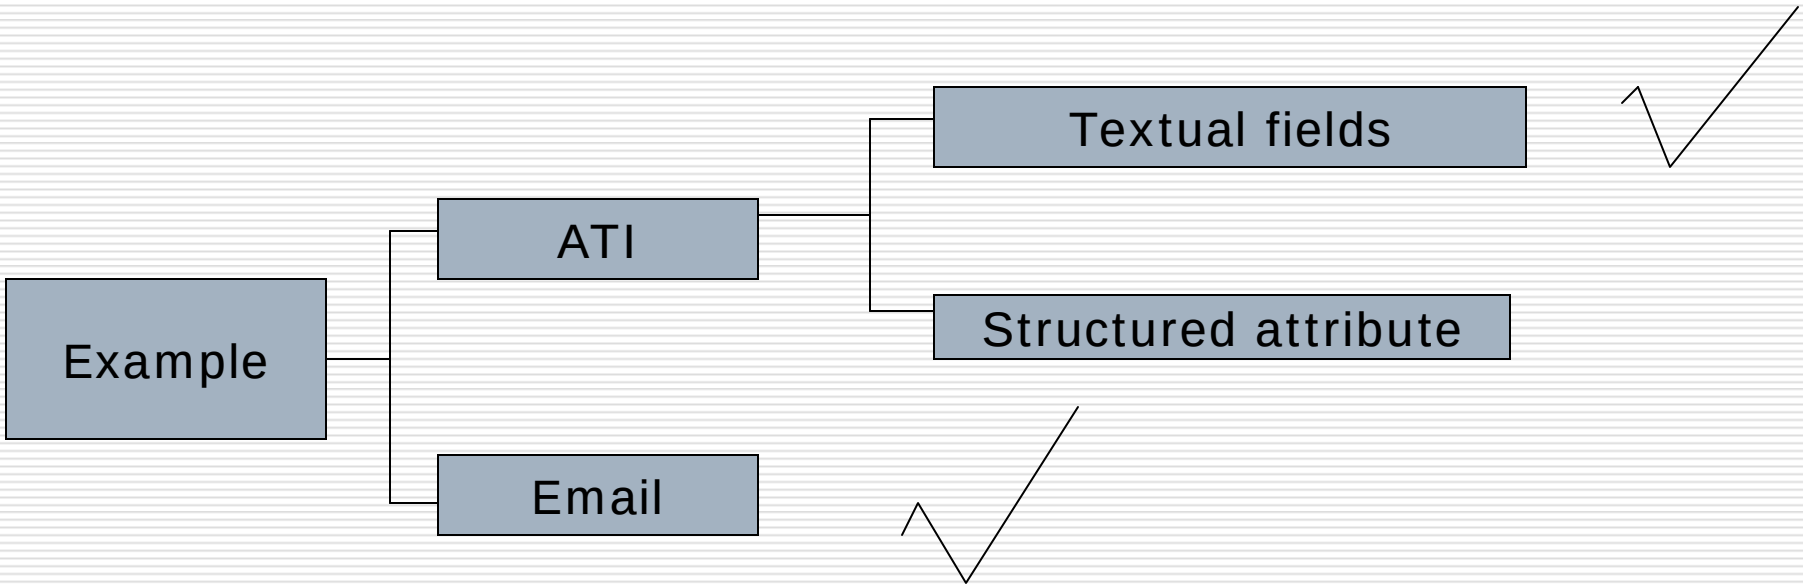

Extracting Lexical Features
Noise words

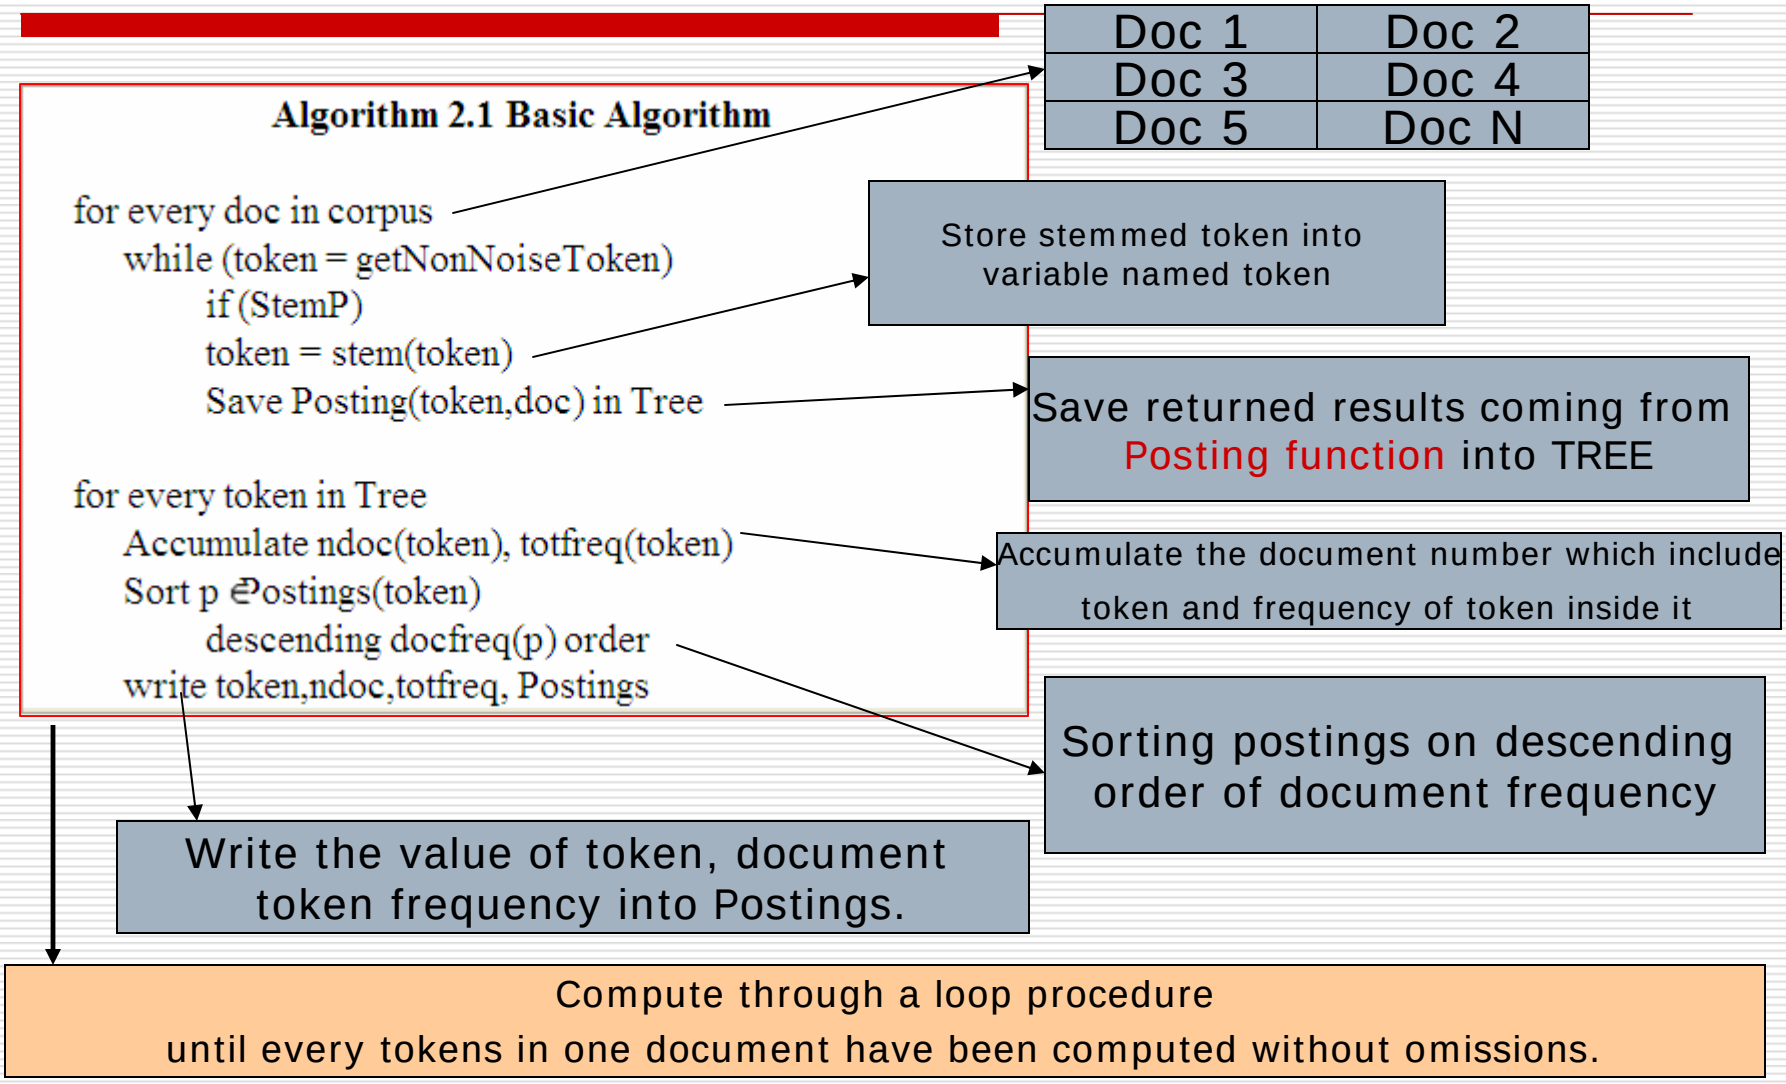

- Noise words ->negative dictionary
- Unsolved problem

The same **tokens** that are thrown away as **noise** because they have no meaning **are** precisely those **function words** that are most important to the *syntactic* analysis of well-formed sentences.

Algorithm 2.2 postdoc.c Details

```
void postDoc (int docno, FILE *docf, long int bpos, long int
epos, char *proxy){
        ...
        GetTermString(&proxyPos, Noise,
        MaxTermSize,newterm);
        ...
        GetTerm(docf, Noise, MaxTermSize,newterm);
        ...
        InstallTerm(newterm, docno, Terms);
        ...
}
```

Illustrate the different type of variable

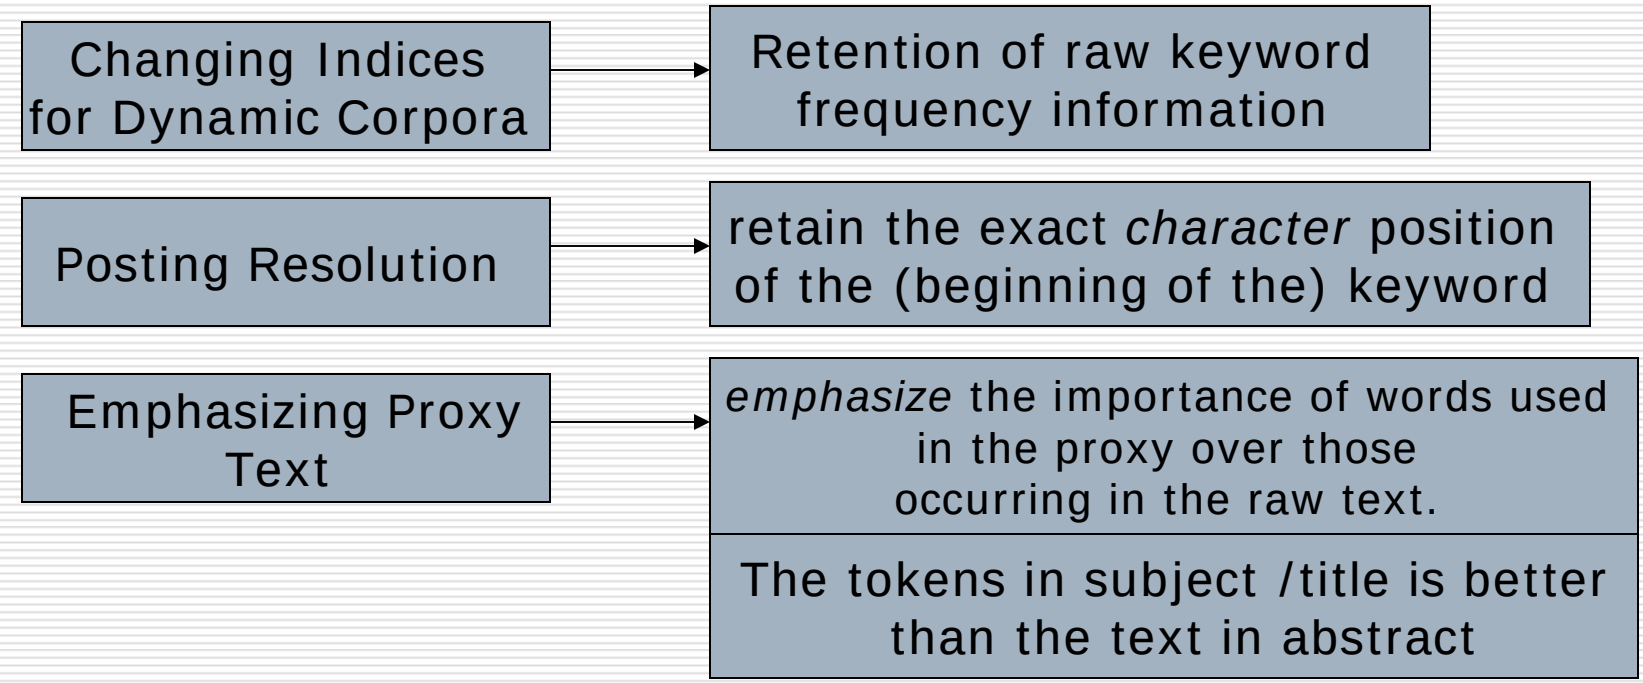

Inserts a new posting into the Terms tree

Important attention

Extracting Lexical Features

A special consideration on Document type

Original email

Email

They mean the message under symbol “>”, has a duplication on original email body
