Administering Users

The Sierra Administration Web application's **Users** function manages Users. Tasks you can perform with this function are:

Adding Users
Deleting Users
Changing User Passwords
Editing Users

Adding Users

To add a new user, you must be assigned permission 721 (Create Login). See Permissions Used by Sierra for more information.

To add a new user, follow these steps:

1. Choose **Authorizations and Authentication** from the **Administration Applications** menu.
2. Choose **Users**.
3. Click **CREATE USER**.
4. Edit the User Parameters.
5. Click **SAVE**.

Deleting Users

To delete a user, you must be assigned permission 723 (Delete Login). See Permissions Used by Sierra for more information.

To delete a user, follow these steps:

1. Choose **Authorizations and Authentication** from the **Administration Applications** menu.
2. Choose **Users**.
3. Click the **+** to the left of a listed user to expose the **EDIT** button.
4. Click the **EDIT** button.
5. Click **Delete User**.

Deleting Your Own User Account

You cannot delete the account that you are using when you access Authorizations and Authentication Administration.

Changing User Passwords

To change a user's password, you must be assigned permission 30

(Passwords and authorizations). See Permissions Used by Sierra for more information.

To change a user's password, follow these steps:

1. Choose **Authorizations and Authentication** from the **Administration Applications** menu.
2. Choose **Users**.
3. Click the **+** to the left of a listed user to expose the **EDIT** button.
4. Click the **EDIT** button.
5. Click **Change Password**. The system prompts you to enter the password twice to ensure that you enter it as you intend. Note that the password does not display in the dialog, but the legend *<Password Set>* appears to the right of the **Password** prompt once a password has been set.
6. Click **SAVE**.

> **Password Composition**
>
> For passwords, the system accepts up to 12 characters using the letters a-z, A-Z, the digits 0-9, and the following special characters:
>
> `. ! @ # $ % ^ ( ) _ - + = { } [ ] " ' ? < >`
>
> You cannot use diacritic characters such as á or ñ.

Editing Users

To edit a user's parameters, follow these steps:

1. Choose **Authorizations and Authentication** from the **Administration Applications** menu.
2. Choose **Users**.
3. Click the **+** to the left of a listed user to expose the **EDIT** button.
4. Click the **EDIT** button.
5. Choose the user parameter category:

Basic Info

Specifies the user's name, password, and other user-specific parameters.

Applications

Specifies the set of users authorized to access Sierra applications.

Permissions

Specifies the set of users authorized to perform Sierra tasks.

Workflows

Specifies the set of Sierra functions that the user can access.

Options

Specifies the behavior of the system for a particular user. (Equivalent to **Login Manager** in the Millennium system.)

Settings

Specifies the prompts, templates, and other application-specific behavior for the user. (Equivalent to **Admin | Settings** in the Millennium system.)

Preferences

Specifies the appearance of the system for a particular user. For example, the system "look and feel". (Equivalent to **Edit | Preferences** in the Millennium system.)

Import Settings

Copies the settings of an existing user account.
