Media Management Options

The **Media Management Options** file controls prompts and printing charges for the Media application in the WebPAC.

Data Elements

The **Media Management Options** file is edited as a free text file. It contains only the following three triggers:

char_prepend_text=<text>

> **Compatibility**
>
> This trigger is not used in Sierra.

web_prepend_text=<text>

Specifies the text that is prepended to the article titles that display in the WebPAC summary box. For example:

```
web_prepend_text=View or Print:
```

charge_sysprint_page=<n>

Specifies the amount that the library charges to cover the costs of printing each article page (e.g., for paper, toner, etc.). <n> specifies the value in the smallest unit of currency used by your library (e.g., pennies). For example, to set the per-page charge to 15 cents:

```
charge_sysprint_page=15
```

Editing the Media Management Options File

1. In the **Select file** drop-down menu of the **ASAA** function, choose **Media Management Options** and then **Select**.
2. Add or edit the data elements as needed.
3. Enter your changes and choose **OK**.
4. Select the **Save** tool to save your changes.

The system automatically restarts all WebPAC servers running on your Innovative machine(s) after you save your changes.

For more information on editing this file, see Editing Entries.
