Creating Circulation Notices

To create circulation notices jobs and to prepare, generate, and send circulation notices, follow these steps:

1. Choose **Notices** from the **Function** list.
2. Access the notices job parameters screen according to your library's notices setting.
3. Select the parameters for the notices job you are creating.
4. If your library's notices setting enables you to save your notices job, save the parameters for the notices job you are creating.
5. Prepare notices.
6. Send the prepared notices to your patrons.
