Validator for XML Schema REC (20010502) version, as amended

XSV version: XSV 3.1-1 of 2007/12/11 16:20:05

NOTICE: This is a service for a W3C **approved recommendation**. This version is for schema documents with the namespace URI `http://www.w3.org/2001/XMLSchema` and is being actively developed: see XSV for XML Schema 20000922 version for the no longer maintained previous version, for schema documents with the namespace URI `http://www.w3.org/2000/10/XMLSchema`, and XSV for XML Schema 200004007 version for the no longer maintained even earlier version, for schema documents with the namespace URI `http://www.w3.org/1999/XMLSchema`.

Use this form for checking a schema which is accessible via the Web, and/or schema-validating an instance with a schema of your own.

Default output is now text/xml with an XSLT stylesheet. Select fallbacks for browsers which don't support http://www.w3.org/1999/XSL/Transform stylesheets:

- (•) text/xml + official XSLT (suits IE5 and greater, Mozilla)
- ( ) text/xml + early MS XSL support (suits vanilla IE5)
- ( ) text/html (styled server-side: suits Netscape, older IE)
- ( ) xml, but labelled text/plain (works for any browser, but hard to read)
